Senior software developer with 6+ years of professional React experience. My primary area of expertise has been in frontend development, however I am eager to expand my knowledge and skills in all aspects of software development. I take pride in creating software that is not only functional but also well-organized, clearly documented, and easily testable. I am a native Norwegian speaker and fluent in English.

Work experience

Agreena

Senior Frontend Engineer April 2024 - Current

- Wrote React components for company's design system
- Maintained and improved React-based web application for farmers to track and analyze their historical farm data

Lucidtech

Senior Frontend Developer September 2020 - April 2024

- Led frontend development on web application allowing users to train their own machine learning models with historical data, which contributed to the first organic conversion of paid users
- Created internal component library based on Figma designs
- Maintained open source Typescript SDK for REST API
- Wrote custom components for enterprise clients in the app's human-in-the-loop platform, using React for UI, and Python and Docker for pre-processing logic

Bjerk

Fullstack Developer November 2018 - February 2020

- Took over development of in-progress MVP React Native application, working with stakeholders to finish the product by adding missing key functionality and removing bugs, resulting in securing another round of funding
- Implemented backend-for-frontend Apollo-based GraphQL server, using TypeGraphQL and GraphQL Modules.
- Created AWS AppSync resolvers and backend logic with automatic Terraform deployment
- Led development on multiple React-based projects, making technological and architectural choices for both frontend and backend

Volunteering

Oslo Pride

Technical Lead September 2021 - November 2022

Took over as technical lead for internal technology group, communicating with other organizational groups and board members, planning technological changes, helping and guiding fellow developers.

Fullstack Developer September 2019 - September 2021

Worked on the public facing website and created a design system, using React.js, TypeScript and Sanity.io.
